

Studio'100 Architects

s e l e c t e d w o r k s 1 9 9 7 - 2 0 1 7

Studio 100 Architects is a private architectural practise having license to operate all over Hungary. It was founded in 1997 by two partners:

Erzsébet M. Hajnády - managing director and senior architect, who is responsible for the in-house management of the office and the design quality of our projects.

László F. Szász - managing director and senior architect, who is responsible for the clients' relations, the international cooperation and day-by-day company management.

Our staff have many years of experience in creating high-quality multilingual documents.

Studio 100 Architects' design philosophy is that our activity is a service: we concentrate on listening, developing alternatives, researching and creating solutions together with our clients. We are basing our solutions on functionality, durability and cost efficiency.

We do care about the future, so our approach and design practice focuses on flexibility, change and growth. We avoid energy waste and practise environmental responsibility.

We prepare our design proposals with a conviction that functional and visual excellence in architecture yields distinctive projects that are pride to their owners, the users and the community.

pp02-12 ::: industrial & retail

pp13-16 ::: residential & hotels

pp17-26 ::: offices
